

**Class: 2**  
**Term: Spring Term**

**Quest Title:**

**We Care, We Aspire, We Belong**

These words underpin the ethos of our school and the teaching and learning that takes place. We strive to ensure all children care for their community on every level, aspire to be the best they can be and most importantly, develop a strong sense of belonging here at Milverton Community Primary School.

**We care by:** Looking after our s and others' possessions – such as toys.

**We aspire by:** Being the best we can be in all of our learning and learning to improve from mistakes.

**We belong by:** Working together to share and realising that we share some interests – maybe in the same tovs!

**As historians:**

We will look at toys from the past and identify which materials they are made from and how they move. We will compare old and new toys.

**As geographers:**

We will explore our local area learning important mapping and field skills. We will also be comparing our village with our twinned village Longny-Au-Perche and looking at key physical and human geography in the UK and abroad.

**As mathematicians:**

We will be very busy learning about division and how it is the inverse of multiplication. This term will also cover the areas of shape, measure, positional language, statistics and fractions!

**As design and technologists:**

We will design and make a purposeful toy using a mechanism and then evaluate our ideas and products against the original design criteria. Will our toys need to have a force applied to them to make them move?

**As scientists:**

We will identify and sort materials and their properties. We shall change materials by heating, freezing, melting and applying forces. We will create a fair test and record our results. We shall look at and explore simple forces.

**As linguists:**

We will continue to write for a variety of purposes identifying different sentence types. We shall also think about word classes - nouns, verbs, adjectives and conjunctions. We shall learn how apostrophes can be used for contraction and possession.

**Drivers: Personal Learning and Thinking Skills**

We shall be looking at how we can be reflective learners and learn from our mistakes. We will think about resolutions and think about areas in which we'd like to improve.

**Learning outside the classroom and Eco-Schools:**

We have Taunton Museum visiting to help us learn about toys and homes from the past.  
 We will have our Forest School session on Wednesday 5<sup>th</sup> February.  
 On Monday 27<sup>th</sup> January there will be a whole school science day.

**The Arts:**

Look at how we can use different sketching pencils to create different shades and tones when sketching. The children will be exploring different materials and creating art pieces.

**Diversity:**

We will find out about a range of toys from different places and times.

**Quest entry:**

A visit workshop from Taunton Museum to immerse us in toys from the past and give us the opportunity to play with a range of toys from the past.
